**ServiceCenter** is a centralized system for restaurants that allows servers to easily and efficiently manage their orders and tasks.

## Story Boards and Tasks

**ServiceCenter** is aimed for serving staff in restaurants. By presenting statuses of the tables they are serving, users can efficiently manage the many tasks that are required to ensure that their patrons remain happy through the meal.

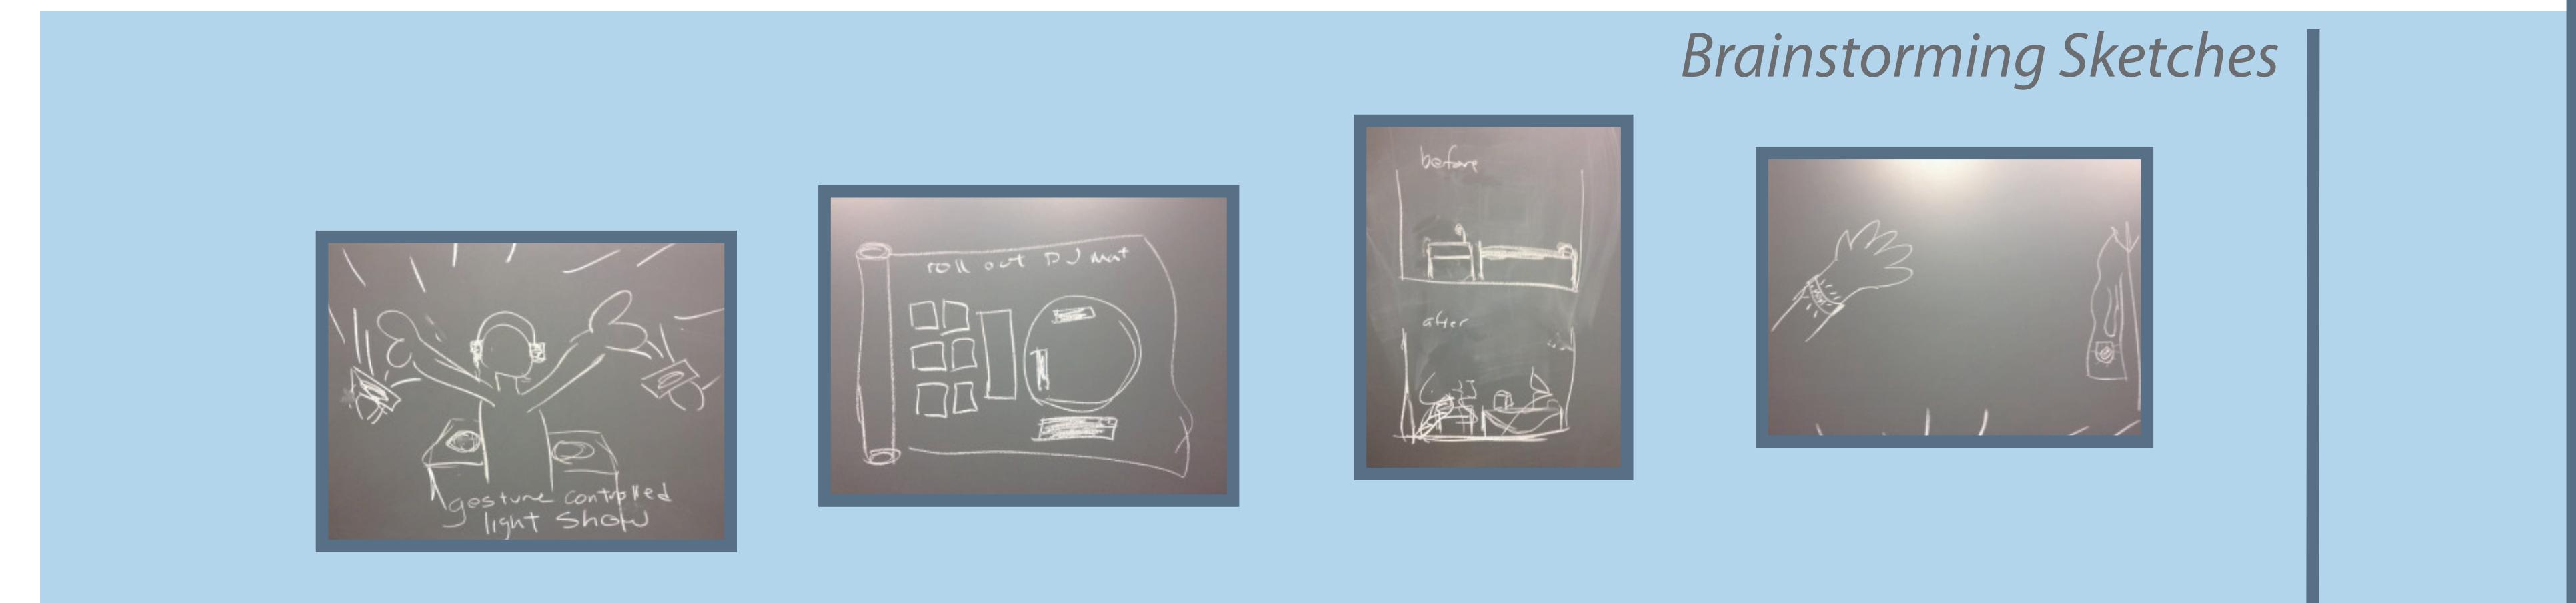

## User Testing

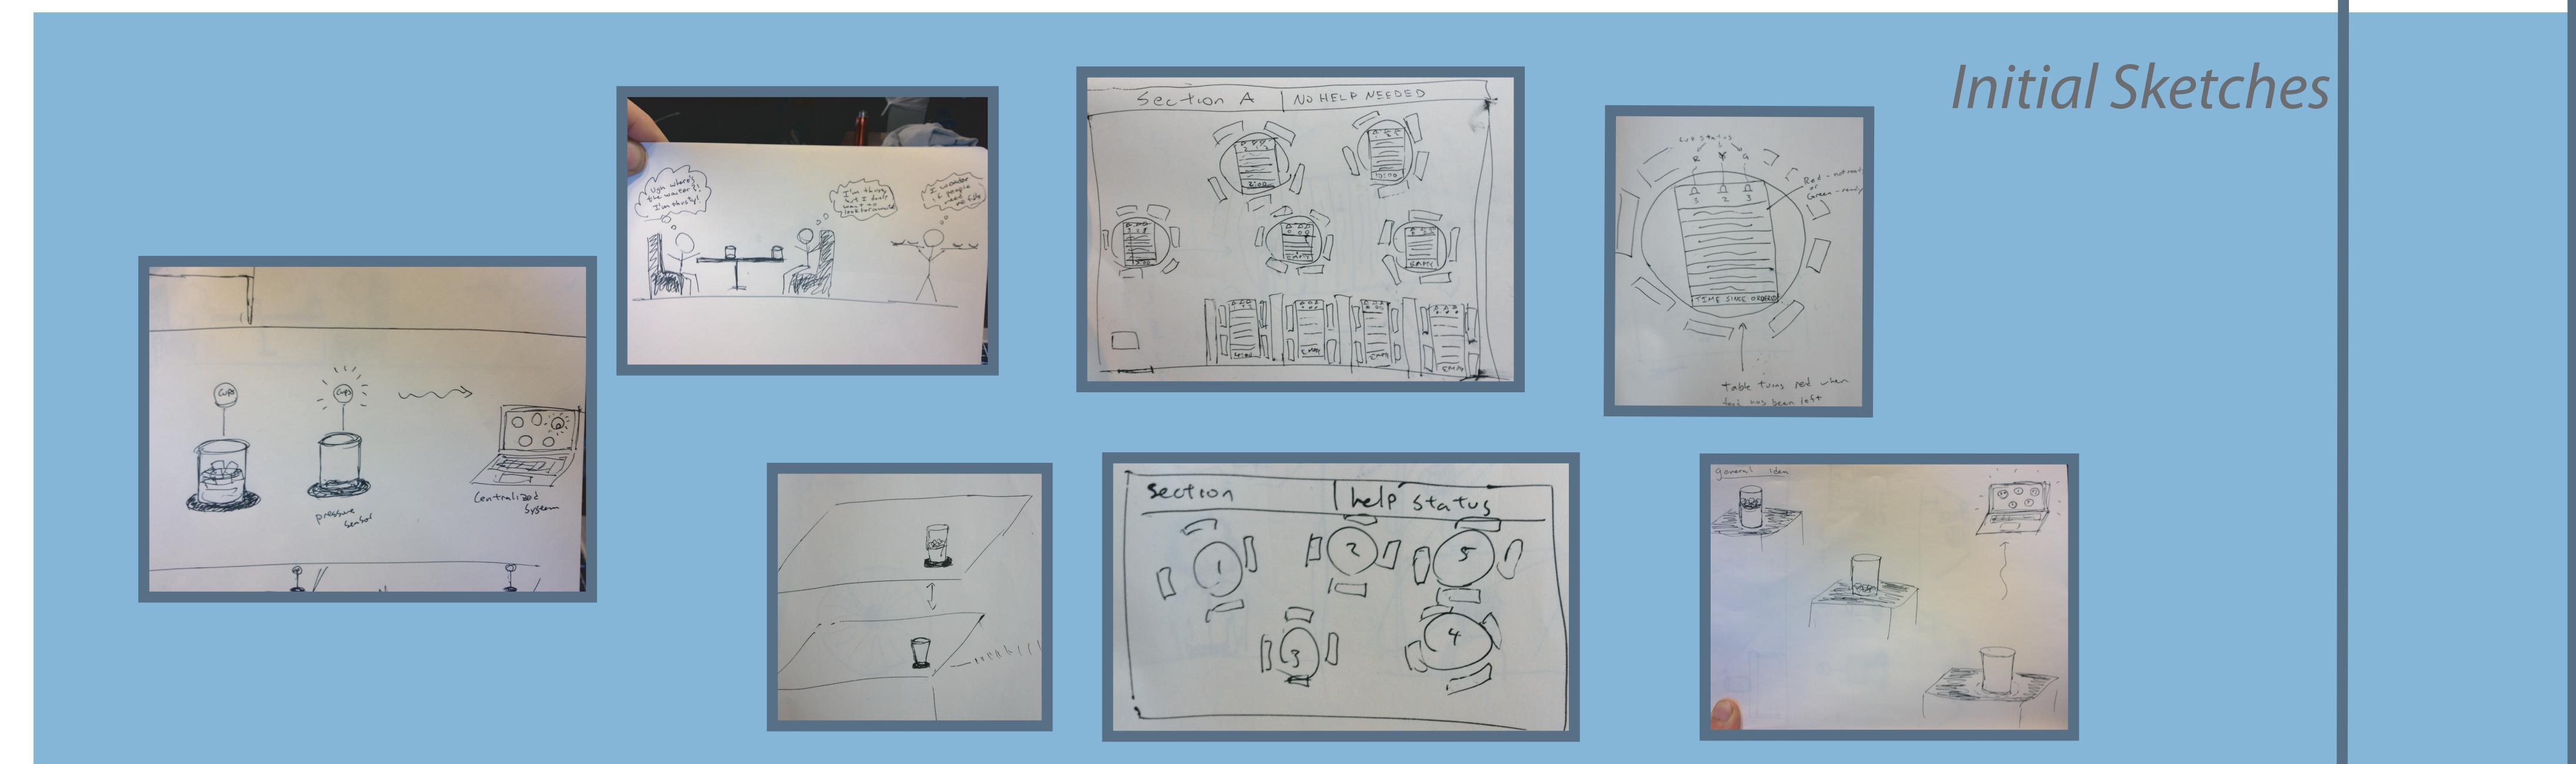

## Project Evolution

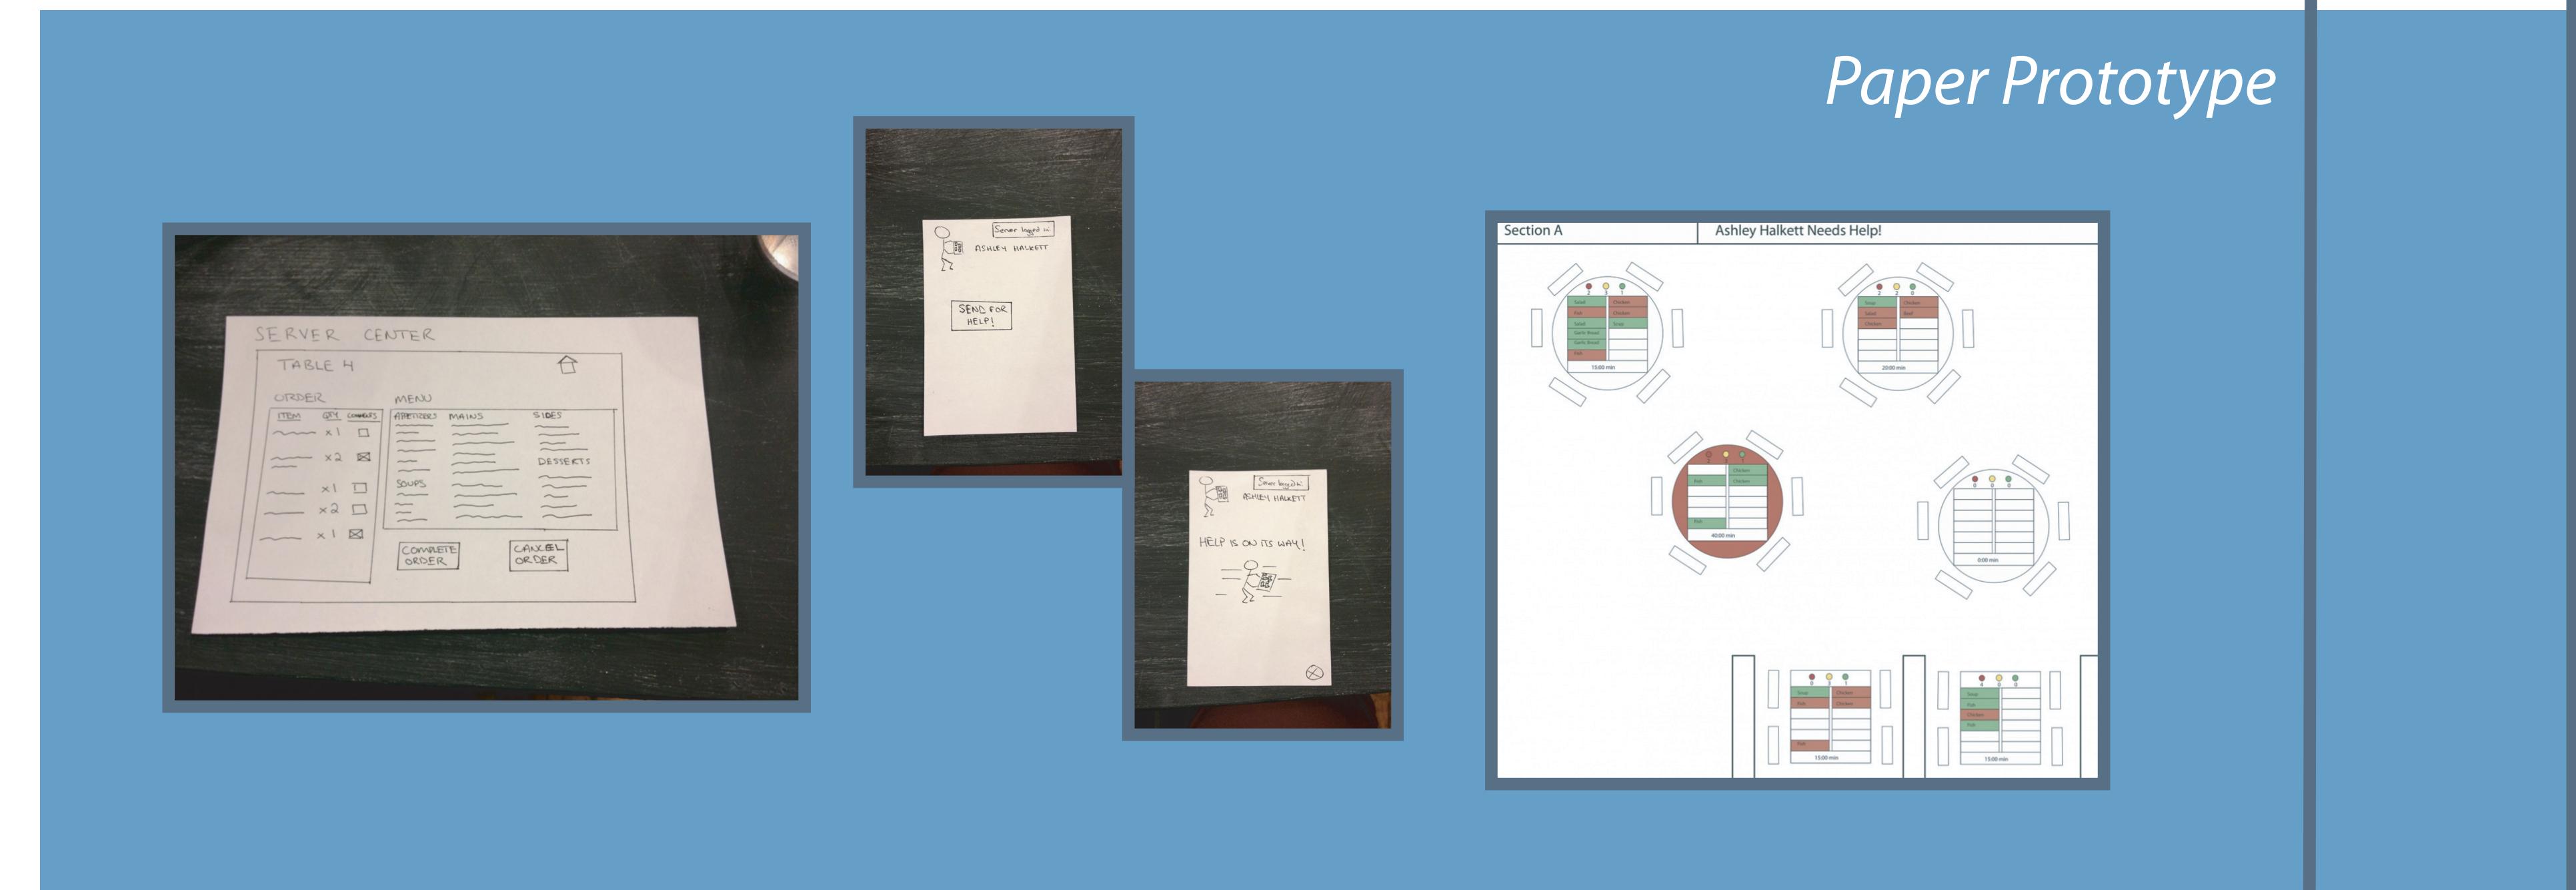

Brainstorming Sketches

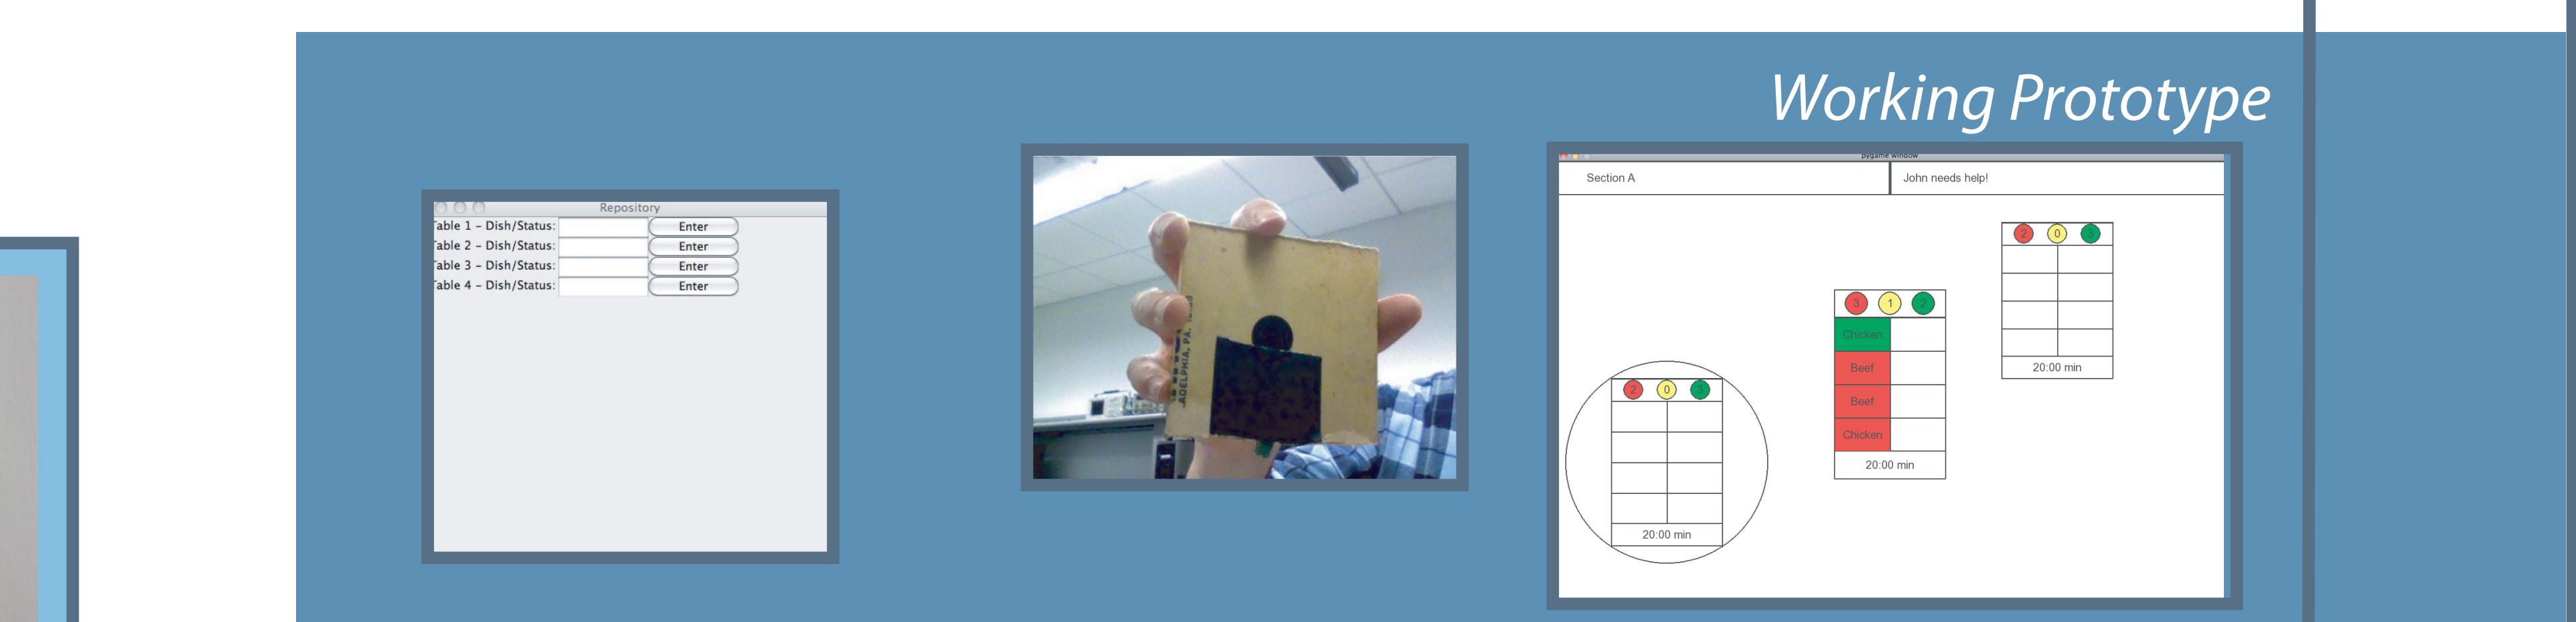

Initial Sketches

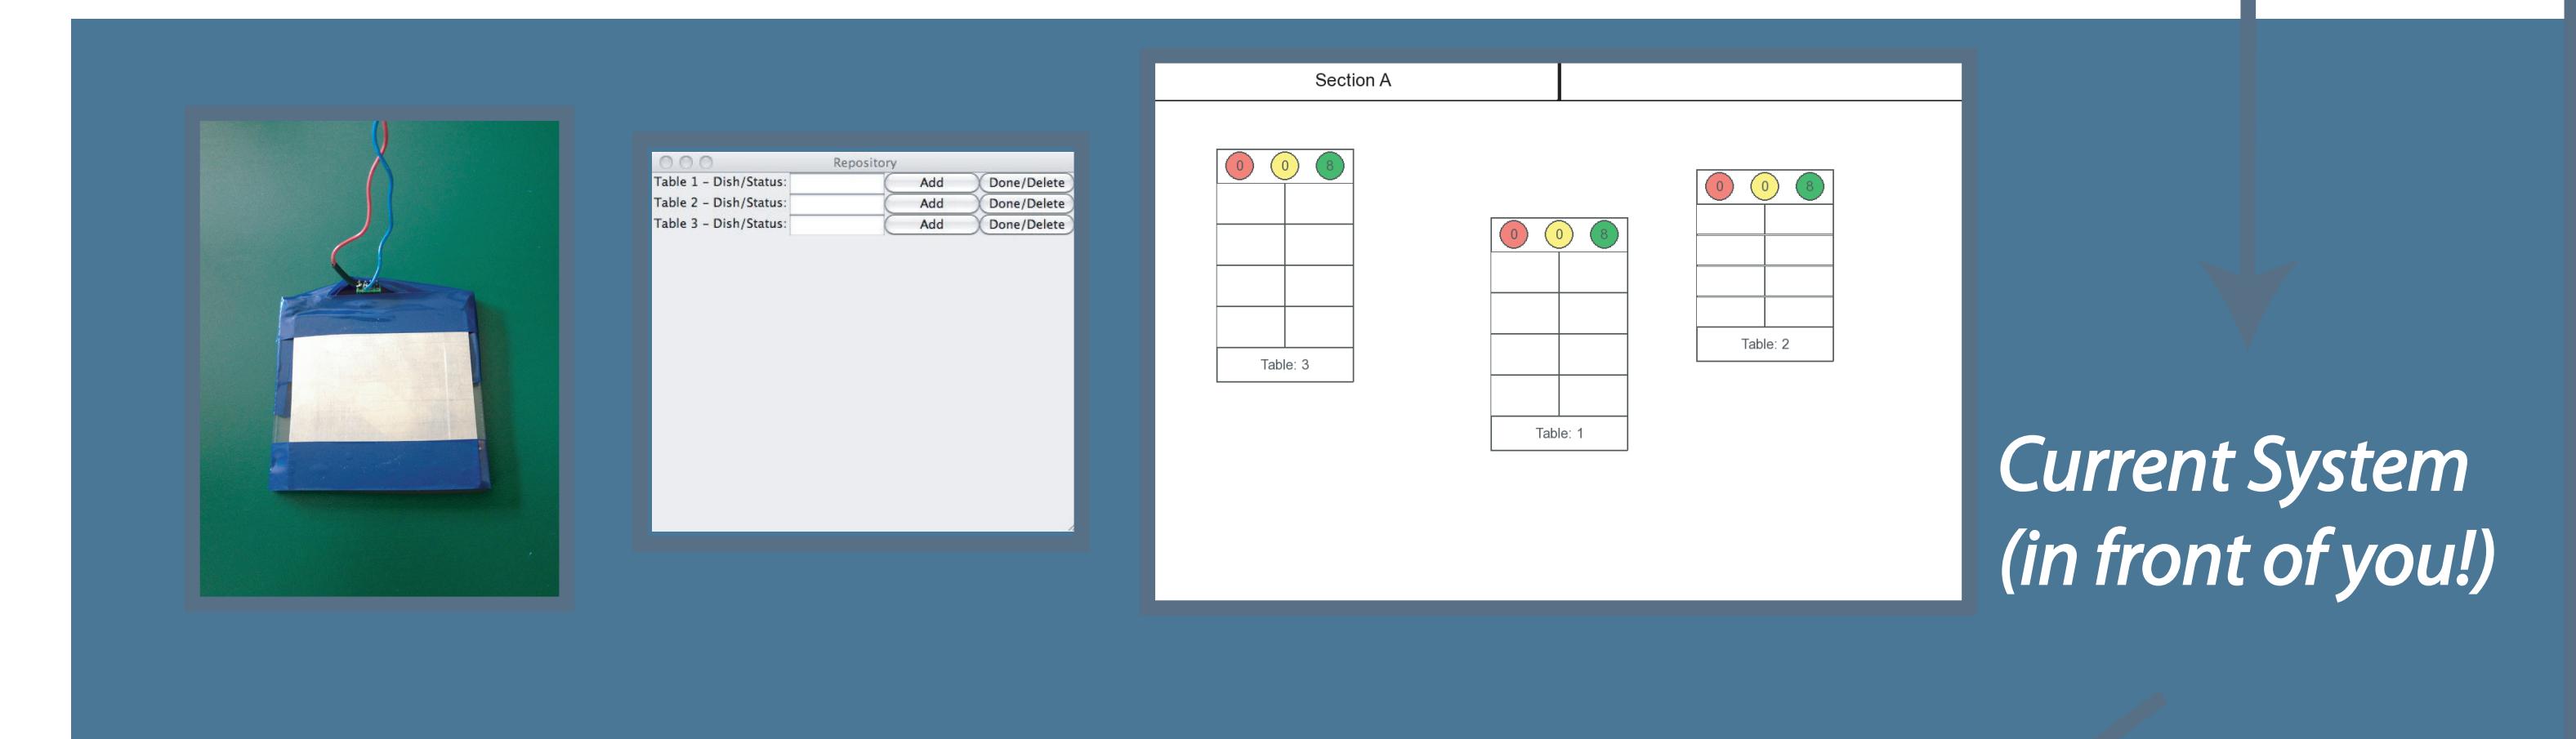

Paper Prototype

Working Prototype

Current System (in front of you!)

## Future Works

Consistent hardware  
User testing in a real restaurant  
GUI for easier set up of motherboard
